## ABOUT

# Grace Of Africa

---

### SHORT BIO

Grace Of Africa is an Afro-Gospel worship project, made for the world. A faceless project blending intimate vocals, choir harmonies, and African rhythms into songs for peace, comfort, and faith. Created by a Norwegian music producer with years of East African production background. Over 12.46M+ streams across 170+ countries since launching October 2025.

### LONG BIO

Grace Of Africa is an Afro-Gospel worship project, made for the world. The music is rooted in African gospel traditions and shaped by contemporary worship, blending intimate vocals, choir harmonies, and African rhythms into songs for peace, comfort, and faith.

The songs are written in both English and Swahili, with English as the primary language. The sound spans several African musical traditions, including elements from amapiano, afrobeats, bongo flava, reggae, and more, always anchored in worship and gospel.

The project is created by a Norwegian music producer and songwriter who spent years in Tanzania producing for some of East Africa's biggest artists. Launched October 2025, Grace Of Africa has grown to over **12.46M streams** across platforms, **10.85M** on Spotify alone, with **220,000** monthly listeners across **173 countries**.

The music uses AI-assisted vocals and production. Songwriting, parts of the production, and creative direction are human.

ORIGIN

# The Story

---

*Create worship music rooted in African tradition that could reach anyone, anywhere.*

Grace Of Africa was born from a career spent inside the East African music industry. The Norwegian music producer and songwriter behind the project spent years based in Tanzania, producing and co-writing for some of the country's biggest artists. These collaborations generated millions of streams and built deep knowledge of African music, audiences, and what makes a song connect across cultures.

In 2025, the decision was made to channel that expertise into something with lasting spiritual and cultural purpose. Grace Of Africa launched in October 2025 with a simple premise: create worship music rooted in African tradition that could reach anyone, anywhere.

Within 7 months, the music has been streamed over **12.46M times** across platforms, reached **173 countries**, and built a devoted listener base of **220,000 monthly fans**. 3 songs have crossed one million Spotify streams: "Under Your Wings", "Restore My Soul", "You Are With Me".
